

GRID INSPIRED ART

wall informa

3G's Informa Collection includes pendant and wall mounted luminaires featuring grid style configurations and adjustable double gimbal lamp holders. Fixture frames are constructed of extruded aluminum with clear, satin etched, anodized finishes. Each fixture features solid aluminum, lockable, double gimbal lamp holders for precise aiming. A variety of lamp sources are available including LED, HID, low voltage, and line voltage.

Wall mounted models include all power supplies within fabricated mounting canopies. Each fixture also features a solid aluminum, adjustable, lockable support arm for maximum flexibility.

When installation is complete, the result is a clean, elegant architectural luminaire that offers adjustable and precise aiming while maintaining a high aesthetic impact.
